

HRSA 16-038

Grants to States to Support Oral Health Workforce Activities

Promoting Prevention

Community-based Preventive Dental Care Grants

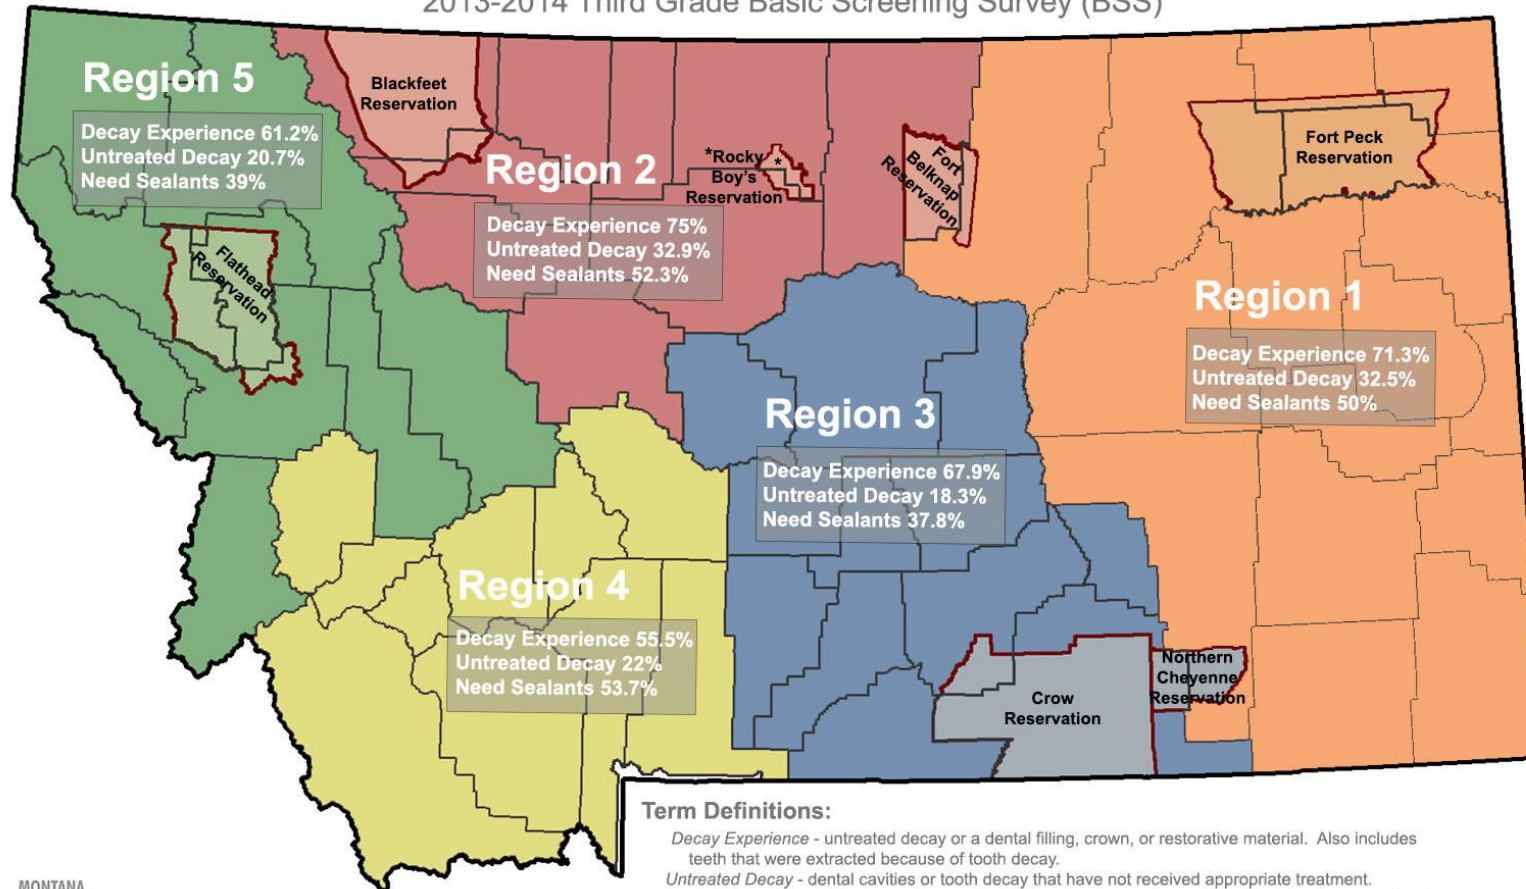

September 27, 2016

Grant Purpose

- Grant Focus Area 1: Integrating oral and primary care medical delivery systems for underserved communities
- Grant Focus Area 4: Community-based prevention service programs for underserved populations, such as water fluoridation and dental sealant programs

Montana Health Planning Regions

2013-2014 Third Grade Basic Screening Survey (BSS)

Term Definitions:

Decay Experience - untreated decay or a dental filling, crown, or restorative material. Also includes teeth that were extracted because of tooth decay.

Untreated Decay - dental cavities or tooth decay that have not received appropriate treatment.

Dental Sealants - plastic-like coatings applied to the chewing surfaces of back teeth to form a protective physical barrier.

Preventive Oral Health Grants

- 3 to 4 grants will be awarded
- Each grant up to \$20,000 per grant year with 2 years of funding
- 40% matching requirement
 - Non-federal funds or in-kind
 - Must relate to proposed activities

Proposals

- Needs Assessment
 - Target population
 - Geographic location
 - Available population data
 - (if data is not available, how will program address gaps in data)
- Methods and corresponding work plan
- Evaluation and sustainability plan
- Budget justification outlining source of matching funds

Selection

- Response For Proposal (RFP) process
 - Began last week following receipt of Notice of Award
- Selection committee
- Anticipated start dates
 - RFP release in November 2016
 - Grant activities begin January 2017
 - Year One ends August 31, 2017
 - Year Two September 1, 2017 to August 31, 2018
